DETAILED ACTION

1. This Office action is in response to the Amendment filed on 2/15/2005.

Allowable Subject Matter

2. Claims 4-6 are allowed. Claims 4-6 have been renumbered 1-3, respectively.
3. The following is an examiner's statement of reasons for allowance:

USP 6,254,205 to Wright et al discloses a drawer interlocking mechanism comprising a base 80, an axle cam 30 having a sticking block 22, a top column 44, two set of brakes 24a.

USP 5,352,030 to Derle et al discloses a drawer interlocking mechanism comprising a base 13, having an axle hole 25, two slots for inserting two set of brakes 20, an axle cam 14 having a block 18, a top column 15, the brakes inserted into the slots of the base 13.

However, the prior art of record does not teach or fairly suggest, in combination with all the elements recited in claim 3, the axle hole of the base having a plurality of curved holes along its periphery at an equal angle, a convex point on a central axis line of the axle hole of each of the two slots of the base, the axle cam having flexible and moveable tab located on each of two opposing edges thereof, each tab matches and locks into one of the plurality of curved holes of the axle hole, and each of the two set of brakes having a brake guide groove including a stop selectively engaging the convex point of one of the two slots.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3637

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Westwinkel, Sawatzky, Higuera et al, Mitchell et al '396 all show structures similar to various elements of applicant's disclosure.
